To: Responding vendors

From: Jim Gunn, RFP Coordinator

RE: RFP 03-707 Vendor questions and DRS responses

Question #1. You indicate that off-site work can be done by a contractor. Will DRS supply the dial-up software necessary to log on to the DRS system?

DRS response: DRS will evaluate on an individual project basis whether dial up access for off site work will be sufficient to meet the project deliverables. Typically, work at another site is intended to be that which can be done without network access.

Question #2. The mandatories for programmer/analyst include ADABAS/Natural and COBOL. Does this mean that each candidate must have both ADABAS/Natural and COBOL or can we submit super ADABAS/Natural people and super COBOL people?

DRS response: Contractors need to have some level of expertise in all the mandatory requirements.

Question #3. How many resumes are you looking for? Do you know how many positions will be available?

DRS response: At this point we do not know how many positions will be available.
